

Committed to getting your job done. Easier.®

April 1, 2018

Dear Valued ABC Supply Customer:

I would like to first thank you for your continued patronage and business. As a result of ongoing manufacturer price increases, freight increases, loader increases and operating cost increases already incurred our pricing will be increased in all product segments including steep slope, low slope, siding, metal and windows beginning May 1, 2018. All associated accessory items related to each product segment will also increase. Metal accessories may increase by as much as 25%. Other product segments will be less. You may expect further increases as the year progresses. We are already experiencing record economic growth and storm demand nationally.

Like your business, we cannot continue to absorb these material cost increases without the need to pass them along. Our branches, managers and sales associates have copies of each of these manufacturer increases available upon request. Please request any that you would like.

These increases are real and not punitive; conversely they provide you our customers the opportunity to sell your services at a higher price.

As always, ABC will strive to keep you ahead of these increases and inform you of product availability with as much notice as possible.

From all of us in the ABC South Florida District Thank you for making ABC your supplier of choice.

Respectfully,

Tim Hashagen
SFL District Manager
